

A close-up photograph of two men in business attire. The man on the right is wearing glasses and has a beard, looking intently at a laptop screen. The man on the left is also looking at the screen. The background is blurred, suggesting an office environment.

Operational Risk Management Awareness Training Course

An Interactive E-Learning Course for End Users

A well-crafted course that is oriented towards the BFSI industry, providing a broad overview of the possible impact caused by inefficient or failed systems and processes.

Operational Risk is quite broad, with specific niches for each risk domains. Hence, the course is structured to provide an overview of various Operational Risk elements.

The course uses practical, interactive, real-life scenarios to enable the learner to experience various risk elements. Further, the learner is briefed on essential safeguards and best practices to mitigate these risks.

Course overview

The course introduces the learner to the definition of Operational Risk. Following the introduction, the learner explores case studies of operational failures that resulted in risk manifestation and exposure. The course continues to brief the learner on systems, procedures and cultural aspects required to manage Operational Risk successfully.
